A litte bit
about myself

Creative professional with over 6 years of experience in the creative industry and a strong foundation in Visual Communication Design (DKV) and graphic design. Experienced in developing creative concepts, brand identities, marketing campaigns, and digital content. Passionate about combining strategic thinking, visual storytelling, and creative execution to deliver meaningful brand communication.

I believe that good creative work goes beyond aesthetics. It starts with understanding the audience, identifying the right message, and developing ideas that serve a clear purpose. I also value open communication and collaboration, as I believe great ideas can grow through different perspectives and shared experiences.

Outside of work, I'm passionate about music, automotive culture, photography, and anything that sparks creativity. I enjoy exploring new environments, discovering different perspectives, and finding inspiration from everyday experiences.
